About the academy

The Year 9 and Year 10 Rugby Academies are classes that replace the student's regular PE & Health class. The key parts of the PE & Health curriculum are still delivered.

Everything that makes the academy successful stays the same, including our alliance with NRU and their staff, who help deliver the programme.

Why this model works

- Students get their rugby development during school hours
- WBHS PE staff can now be allocated to help deliver the programme
- NRU staff continue to support delivery
- Students still complete the vital components of the PE & Health curriculum
